

Plus 3

Three turns to six – a bench doubles the possibilities. Without much hassle plus3 eliminates unattractive emergency seating arrangements. Seating arrangements may be extended by three seats and they offer guest a nice reception.

Three stools are cleverly hidden in the bench without falsifying the design – they may be arranged around any table without effort.

High-quality solid wood side panels make the bench most attractive, the floating backrest makes the furniture appear light and offers relaxed sitting comfort.

Instead of the stool variant as additional seating location, a second bench may be integrated. The removable leather seat cushion enables integration of the additional bench underneath the first one.

The seating cushion is nicely stored underneath the bench
Space saving, smart - plus3.
