Sofitel Paris Le Faubourg

The Paris 5-star hotel offers a total of 147 luxury rooms and suites in a quiet location in the otherwise quick-paced capital. The hotel is located next to the Place de la Concorde, the American embassy and numerous elegant boutiques.

Salzburg hotel designer Voglauer first of all convinced the hotel operators with excellent execution and the presentation of a model room, along with various reference objects. A total of 110 rooms and 14 suites in the old hotel building where virtually every room has a different layout and concept, were decorated in top Voglauer quality.

Voglauer hotel concept was brought in as general contractors for the turn-key renovation, with the exception of electrical and air conditioning. The logistics aspect was surely a challenge which was averted, as there is no storage area on site.

The 5-star hotel was planned based on the Didier Gomez design, and reflects the world of fashion and luxury of the elegant district of Faubourg St. Honoré. The 18th century elegance and classy, primarily French, materials are harmonically combined with modern design. An expression of Paris elegance with couture style. The suites and villas feature the unique charm of a manor house and the prestige of a flatlet with a view of Paris. The common area also features a luxurious Paris style. Two conference rooms equipped with the latest technology hold up to 50 persons. Comfort, quiet and elegance await guests in this 5-star hotel.
