

Sustainability and modernity in Hotel Tauernhof in Flachau

The 4-star funsport & bike Hotel Tauernhof, in Flachau, has been sustainably renovated and modernised.

Thanks to their proven quality and excellent value for money, the international furniture manufacturer Voglauer hotel concept, from the Lammer Valley, was once again able to demonstrate itself as the best partner for the general renovation of 24 single and double rooms in summer 2014.

Materials such as larch and oak were used together with modern accents. The bed headboard, in the style of a mountain silhouette, gives the designer rooms an additional alpine character. Practical features for sports enthusiasts and sufficient storage space were factored in during planning.

In addition to aesthetics, sustainability was also a major concern for the client. That's why energy-efficient windows and insulation facades were installed.

Additionally, Hotel Tauernhof offers a fun sports hall, a gym, a sports camp with bike shop and a spa to relax. As the leading bike hotel in the Salzburg sports world, winter sports enthusiasts will love the central location, as well as the hotel's own ski and snowboard school.
